

ABSTRACT

A consumable order assistance system is provided for computer peripheral devices. The system includes a personal computer, at least one computer peripheral device, a communication link, and a consumable order assistance computer program. The personal computer has a web browser and a messaging system. The at least one computer peripheral device has a messaging system. The communication link signal couples the personal computer with a provider of a consumable for the computer peripheral device via the web browser. The consumable order assistance computer program is provided on the personal computer and is configured to receive a notification from the computer peripheral device via the messaging system of a need to order a consumable, alert a user of the personal computer of the notification, and provide an order location to the user for the consumable. A method is also provided.
